B. An expert about waste disposal answers two questions. Circle the most suitable present or future forms.

The disposable society

What do you predict about waste disposal in the future years?

We are all consumers. We want all the latest technological items. The problem for the future? "How (1) with all the waste?" While now the average amount is over 500 kilos of waste per person per year, it is calculated that it (2) in the next decades mainly involving obsolete high-tech items that consumers (3) simply away. We (4) already this.

Why do consumers continue to buy high-tech items they don't really need?

Now companies (5) more and more new models at competitive prices so technology (6) obsolete very fast. As a result, in the times to come it (7) (neg.) economically viable to repair old models. At present consumers (8) a huge number of perfectly usable machines, that (9) dangerous chemicals. Therefore the clean and safe disposal of these items (10) a serious issue in the next few years.
